

# engineering success.

[www.3HTi.com](http://www.3HTi.com)

3 HTi is a complete sales and service firm that provides holistic solutions for Product Life Cycle Management (PLM). We work with customers to optimize the complete design throughout the manufacturing process. 3 HTi provides uncompromised service and support to provide customers with the knowledge and tools to reach maximum productivity.

# 3HTi Software Product Portfolio

PTC® the product development company®  
**Creo™**

A scalable offering of integrated, parametric, 3D CAD, CAID, CAM, and CAE solutions allows you to design faster than ever, while maximizing innovation and quality to ultimately create exceptional products. Creo, PTC's 3D parametric modeling system, uses proven technologies from Pro/ENGINEER®, CoCreate®, and ProductView®.

PTC® the product development company®  
**Windchill®**

Windchill enables manufacturers to streamline product development processes while delivering superior products. Windchill has the control and configuration capabilities to collaborate across the extended enterprise.

PTC® the product development company®  
**Mathcad®**

Mathcad simultaneously solves and documents engineering calculations while dramatically reducing the risk of costly errors. Mathcad lets engineers design, solve and document their work in a comprehensive format that they can share and reuse, thus improving verification and validation, publishing and collaboration throughout the entire development process.

PTC® the product development company®  
**Arbortext®**

Successful products depend on timely, accurate technical information to be easily accessible for operation, assembly, maintenance, field service and training. Arbortext provides the capability to define, author, illustrate, manage, and deliver exact product information in the reader's preferred language and media.

**Vuuch**

Vuuch enterprise social software helps a team "get work done" by organizing and managing the work based on deliverables, connecting the people involved and improving the process of solving problems, completing tasks, discussing and ultimately making decisions.

**Mentor Graphics FloEFD™**

FloEFD is part of a dynamic range of CFD tools from Mentor Graphics called Concurrent Computational Fluid Dynamics (CCFD). Concurrent CFD is a breakthrough technology that enables design engineers to conduct upfront, concurrent CFD analysis throughout the product's lifecycle, using the familiar MCAD interface.

**Moldex3D**  
MOLDING INNOVATION

Moldex3D is a CAE software product for plastics injection molding that provides a user-friendly interface for CAD users to access true 3D flow simulation results and optimize product design and manufacturability.

**NC SIMUL**

NC SIMUL is a complete machining simulation software for debugging, optimizing and verifying NC programs for CNC machine tools.

**KENESTO**

Kenesto is a business process automation system that uses cloud computing to enable companies to manage product processes of new product introductions or manage changing products that are already in the market.
