Small Business Acquires Unique Technological Capabilities Through 3HTi

BACKGROUND

Regenbogen Studios is a design and development company providing solutions for custom products. They use a mixture of traditional craftsmanship and advanced manufacturing technologies to realize their clients' visions.

They owned an FDM printer but were looking to achieve a higher level of resolution and quality in what they could

SOLUTIONS

Scott, the owner of Regenbogen Studios, purchased the Micro-Advantage Plus 3D Envision Tech printer from 3HTi, bundled with printing materials and a license for Keyshot 3D Rendering Software.

Scott calls the the Envision Tech machine "awesome." It allows his team to print high-resolution parts ready for end-use in electronic devices -- something they were never able to achieve with their FDM printer. The Micro-Advantage Plus offers a level of reliability and accuracy beyond anything their peers and clients are accustomed to, allowing Regenbogen Studios to take on projects and produce results that their

// I am a big fan and advocate of this technology. Being a small business that has this capability provides a unique advantage.

Scott Regenbogen, Owner @ Regenbogen
